METEC

Standard-Catalog 2014/2015

high class

work equipment

Dear Customer,

with this catalog we present a current overview of our series products, the standard range of quality workshop equipment.

As part of the German group Jordan, we have

- 25 years cutting-edge technology in sheet metal construction
 - and for over 20 years quality workshop equipment
- the strong brand METEC - Made in Germany -

At three locations in Germany we produce for you customized products and solutions to enhance your own performance.

On the following pages you will discover

- many very good old friends, our established bestsellers
- interesting innovations, our innovative developments
- the excellent solutions from our individual systems
- the user-friendly ways of 3D tools pcon[®].planner
- an insight into the diverse range of our sheet metal manufacturing

All products are finished in function, design and ergonomics, technically thought out, highly flexible, durable, sturdy and highly resilient.

In addition to the series products shown here always glad to fulfill almost any individual wish on request.

Use our products and our capabilities to your advantage anywhere in your business, whether, in the workshop, on the machine, in the laboratory, in the warehouse, in the social space, or at any other point in the value chain.

German top quality is always worthwhile.

Talk to us.

The local dealer, and our experts in-house will gladly advise you.

Your team of Jordan GmbH METEC Blechsysteme

PLANNER

How do you get the pCon®.planner?

It's easy!

- Visit us on www.metec.eu and click on the download link on the homepage.
- If you have questions or problems with the software, we support you at the following telephone number: +49 (0) 39266/760-15
- If you happen to one of our articles not included in pCon®.planner, we offer you this like to separately.
- Or, we make it to you ...
You give us the design of your Premises and send us this simple your floor plan.

Our range of Jordan Group of Companies in the sheet Structural Engineering

In addition to the production of high quality workshop furniture, we are also as a supplier in the sheet metal structural engineering works. We supply from simple sheet metal part to complex assemblies to housing customers throughout Germany.

Technically and organizationally we are well equipped. In the modern manufacturing dominated by CNC machines. Business processes and productions are controlled with the PPS system.

In the construction we work with the 3D design programs SolidWorks[®], HiCad & SheetWorks[®]. The software offers a very wide interface, which gives us the opportunity to take even 1:1 complex drawings from customers and further process.

New designs whose base is often just an idea, can be very quickly visualized and processed.

With our modern machinery, such as Punching and bending center, and much more more welding robot as well as our highly trained professionals, we are able to fulfill all your wishes in contract manufacturing: Least item lead times and low set-up costs even for small series.

In the surface, we work with its own powder coating plant with automatic guns, 4-chamber pretreatment and deionized water.
